Possibility That the Total Shipments May Reach \$10,000,000.

Bond Syndicate Thought Able to Protect Treasury Reserve.

The increasing volume of gold shipments has begun to cause some anxiety in financial circles, lest the Bond Syndicate may not be able to protect the Treasury reserve, as the agreement which was entered into with the Government at the time of this issue of the bonds called for.

The accomplishes which sail for Europe

The steamships which sail for Europe to-day take away with them more than \$1,000,000 in American gold coin, and the withdrawals yesterday from the Sub-Treasury bring the amount intended as pan & omale for immediate shipment from the councillation of this \$1,000. The steamships which sail for Europe Treasury bring the amount intended at Paul for immediate shipment from the country up to nearly \$2,500,000. Of this \$1,000. 000 is for shipment to Canada and will sauthern italies per forwarded some time next week. Tenn Coal & Iron

The balance is to go to English and U.S. Correction houses.

It is said, however, that the Syndicate is fully aware of the causes which have led to this sudden increase in gold w. 4 i. shipments, which is due to the comercial necessities of importers in satisfying bills of exchange drawn by the firms, and has made preparations to re- The Market Rose 10 or 12 Points losses of the Treasury which have resulted from this drain upon its

Foreign bankers say that there has been no recent change in the price paid by the Hank of England for American gold coin. The quotation is 768, 3-41, per ounce.

The only feature of importance in this week's statement of the New York banks is the expansion of over \$1,00,000 in loans. Owing to the change in this item, deposit liabilities are increased. The banks show only a small change in their cash holdings, the expers of gold not being reflected in the exhibit.

It is understood that the gold withdrawn from the Sub-Treasury and shipped to Europe will be replaced by the Bond Syndicate next week. The banks for \$1,079.400 in surplus reserve, which now stands at \$40.917.175, against \$60.005.

Stocks closed at a reaction of 1-8 to 5-8 per cent from the best figures of the morning. The market, however, was firm in tone and the recent sellers for the short account had to acknowledge themselves beaten.

They have not yet succeeded in covering their lines and the floating supply of shares is by no means laize. The sales of stocks were 61,000 listed in the unlisted department 48,000 shares of Sugar were traded in.
